

⚠ WARNING MESSAGE

GENERAL WARNING

Before you begin, please read through the instructions together with your children. Make sure you understand the safety messages. Please keep the packaging and instructions, as they contain important information. This kit is designed for children over 8 years of age. This product contains small parts which may pose a choking hazard. It is not suitable for children under 3 years old. Please keep individual parts and the fully-assembled product away from children under 3 years of age. Screws and other metal parts may have sharp edges. Children should have parental supervision when assembling the product. This kit is intended for indoor use. Water and rain will damage the electronic components. Last but not least, please clean the parts and finished product with a damp cloth. Make sure to remove the batteries from the battery compartment before cleaning. Do not use any soap or cleaning solutions. This toy produces flashes that may trigger epilepsy in sensitised individuals.

OTHER WARNINGS

Using a screwdriver

1. Please ask parents or another adult permission to use the screwdriver.
2. You must always be supervised by an adult when using the screwdriver. The metal may have sharp edges that can cause injury.
3. Do not throw the screwdriver at other people or animals.
4. Put the screwdriver back in its proper storage place after use.
5. Do not use a screwdriver near children under 3 years of age.

Using batteries

- Do not charge non-rechargeable batteries;
- Do not mix different types of batteries or new and used batteries;
- Insert batteries with correct polarities;
- Remove exhausted batteries from the toy;
- Do not short-circuit supply terminals;
- Remove rechargeable batteries from the toy before charging;
- Charge rechargeable batteries under adult supervision only.
- do not use rechargeable batteries.

Accessories list

Serial	Name	Quantity
1	PCB box	1
2	Vehicle chassis	1
3	Battery box	1
4	Vehicle body	1
5	Battery box cover	1
6	PWB 2*6 screw	1
7	PB 2*6 screw	5+1(spare)
8	Stickers	1

Required Tools

Cross-head screwdriver

Batteries
2 x AA (1.5V)

Installation

- 1 As shown in the diagram, Install the control box.
- 2 Paying careful attention to the orientation of the plug, insert the three-line cable assembly jack into the PCB board.

- 3 Plug the power cable into the PCB board. Then plug the battery box into the chassis port. Tighten the screws.

- 4 Install the batteries. Switch the power to "ON". The headlights should light up. If you put the car on the black path, the vehicle should slowly move forward. This indicates that everything is normal.

- 5 After testing to see if everything is normal, attach the body of the vehicle to the frame and tighten the screws.

- 6 Install the battery cover and tighten the screw.

- 7 As shown in the diagram, add the stickers.

What does it do?

The automatic line tracking bus is designed to follow a line on the map. Turn it on and place it on the map, and it will automatically follow the preset path. You can also draw your own route to guide the sightseeing bus.

How does it work?

It uses a mini programmable computer that allows it to follow the line. It uses small detectors called "diodes" in the same way as eyes, in order to see the line. If you look on the underside of the bus between the two front wheels, you can see them.
